Developmental'

'Melatonin modulation of crosstalk among malignant

May 13th, 2013 - Melatonin

the main secretory product of the pineal gland is an oncostatic agent that reduces the growth and development of various types of tumors particularly mammary tumors whose growth is dependent on estrogens Previous in vivo and in vitro studies point to the hypothesis that melatonin'

'PDF Melatonergic Drugs for Therapeutic Use in Insomnia

November 3rd, 2019 -

Although these drugs improve sleep their usage is also associated with number of adverse effects Melatonin the hormone secreted by the pineal gland of all animals and human beings has been used for treatment of insomnias since the timing of its secretion in humans as well as in most of the animals coincides with the increase of

nocturnal''Relevance of pineal gland Science versus religion

December 16th, 2019 - The pineal gland is a small but critical hormonal gland in our body It is considered as a regulating or master gland that regulates the cycles within our bodies Its purpose and function are still largely a mystery to science and research on it is yielding very interesting

discoveries especially on
its connection to
spirituality and higher
states of consciousness'

Dimethyltryptamine Wikipedia

December 25th, 2019 - N N
Dimethyltryptamine DMT or N
N DMT is a chemical
substance that occurs in
many plants and animals and
which is both a derivative
and a structural analog of
tryptamine It can be
consumed as a psychedelic
drug and has historically
been prepared by various
cultures for ritual purposes
as an entheogen DMT is
illegal in most countries'
