possible to display an alert

or popup message using powershell remoting on remote systems I have found one way of doing it using Invoke WmiMethod Class Win32 Process puterName xxxx Name Create ArgumentList C Windows System32 msg exe This is a test message 'Windows Run mands to Help You Work Your System

April 30th, 2020 - Run mands can be used to access various aspects of your puter without going through the Control Panel or menus If you re in the process of tweaking your system so it bees more responsive you may find these mands useful 'Use PowerShell

Invoke mand to run scripts on remote

April 30th, 2020 -

Introducing PowerShell

Remoting When it es to

managing remote puters with

PowerShell you have

essentially three options You

can open an interactive

session with the Enter

PSSession cmdlet One to One

Remoting An alternative is

the Invoke mand cmdlet which

allows you to run remote

mands on multiple puters

which is why it is called One

to Many Remoting'
