'numerical linear algebra

March 9th, 2020 - numerical linear algebra is the study of how matrix operations
can be used to create puter algorithms which efficiently and accurately provide
approximate answers to mathematical questions it is a subfield of numerical
analysis and a type of linear algebra because puters use floating point
arithmetic they cannot exactly represent irrational data and many algorithms
increase that'

'calculus in context johns hopkins university press books

May 22nd, 2020 - a new approach to teaching calculus that uses historical
examples and draws on applications from science and engineering breaking the
mold of existing calculus textbooks calculus in context draws students into the
subject in two new ways part i develops the mathematical preliminaries including
geometry trigonometry algebra and coordinate geometry within the historical
