problems'

'Heat Wikipedia  
May 2nd, 2018 -

In  
thermodynamics  
heat is a type  
of energy  
transfer in  
which energy  
flows from a  
warmer substance  
or object to a  
colder one It  
can be defined  
as the total  
amount of  
transferred  
energy excluding  
any macroscopic  
work that was  
done and any  
transfer of part  
of the object  
itself'
