**'the role of genes and
inheritance familyeducation
June 3rd, 2020 - genes are
located on rodlike structures
called chromosomes that are
found in the nucleus of every
cell in the body each gene
occupies a specific position
on a chromosome because
genes provide instructions
for making proteins and
proteins determine the
structure and function of
each cell in the body it
follows that genes are
responsible for all the
characteristics you inherit'
